54S/74S109
54LS/74LS109

DUAL JK POSITIVE EDGE-TRIGGERED FLIP-FLOP

DESCRIPTION — The '109 consists of two high speed, completely independent transition clocked JK flip-flops. The clocking operation is independent of rise and fall times of the clock waveform. The JK design allows operation as a D flip-flop (refer to '74 data sheet) by connecting the J and K inputs together. The '109 is functionally equivalent to the 9024.

TRUTH TABLE

INPUTS		OUTPUTS
@ t_n		@ t_{n+1}
J	K	Q Q
L	H	No Change
L	L	L H
H	H	H L
H	L	Toggles

Asynchronous Inputs:
LOW input to $\overline{S}_D$ sets Q to HIGH level
LOW input to $\overline{C}_D$ sets Q to LOW level
Clear and Set are independent of clock
Simultaneous LOW on $\overline{C}_D$ and $\overline{S}_D$ makes both Q and $\overline{Q}$ HIGH

t_n = Bit time before clock pulse.
t_{n+1} = Bit time after clock pulse.
H = HIGH Voltage Level
L = LOW Voltage Level
